Notes

Rebuilt Reciprocating Engine Certificate

This is to certify that the engine as described hereinafter has been REBUILT in accordance with the applicable Lycoming specifications. It has been determined airworthy to return to service and is in a condition for safe operation. All applicable Federal Aviation Administration Airworthiness Directives and Lycoming Service Publications have been complied with. All accessories as part of the type certificate are new or newly rebuilt. Refer to enclosed Form ET001 for applicable accessory part numbers and serial numbers.

Part Number: RENPL-RT8581
Serial Number: RL-30479-48E
Engine Model: IO-540-K1G5

Removed run out engine model Lycoming IO-540-K1GE with serial # L-21478-48A along with all engine components, accessories and aircraft motor mount. Cleaned firewall and engine control cables and wiring. Sent tubular steel motor mount to Aerospace Welding in Minneapolis, MN. for overhaul. Received back and reinstalled on aircraft with new strut seals, bearings and hydraulic fluid and mounting hardware. Installed new Barry engine mounts, part #'s 94011-02 and 94011-03 with new mounting hardware. Installed rebuilt Lycoming engine, Model IO-540-K1G5 with ser# RL-30479-48E and Fuel Servo part# AVSTAR 61M26410 with a new gasket. New Slick Magnetos part#'s 66LC35SDNN (left) and 66LP-0SCNN (right) were preinstalled by rebuilders. A new mechanical fuel pump, part# 62B26931 was also preinstalled by the rebuilders. Attached all engine controls and adjusted. Installed on right side1 new oil cooler, part# 8000074, ser# 10412048 and 1 overhauled oil cooler on left side, part# 8529245, ser# 81D-810 with 4 new hoses. Serviced engine with 12 quarts of 20W50 Phillips Type M Mineral oil.

Performed a 100-hr inspection I/A/W the Textron Lycoming engine manual and generic checklist for this aircraft engine. Ran engine for warm up and operational check. Performed an air differential check on all cylinders with readings as follows. Cylinder #1=80/72 #2=80/74 #3=80/73 #4=80/74 #5=80/73 #6=80/75.

Drained used oil and removed used oil filter. Cut open filter for internal inspection and found normal. Removed oil sump screen for inspection and found clean.

Reinstalled screen with new crush gasket. Installed a new CH48110-1 Champion oil filter and serviced engine with 12 quarts of Phillips 20W50XC engine oil. Removed and cleaned finger screen and gascolator screen.

Reinstalled screens with new gaskets. Cleaned, gapped and checked all sparkplugs. Checked and lubed all engine controls, checked all hoses and wiring. Checked magneto timing to engine and set to 20° BTDC.

Removed propeller governor SN D1125UJ and sent to Sensenich Propeller Service for overhaul. It was returned and reinstalled. Performed engine wash and ran engine for leak and operational check. Found satisfactory and reinstalled all engine cowling and covers.
